## FREQUENTLY ASKED QUESTIONS ABOUT HEALTHY GREENS™ OAT GRASS AND AGRIPET, INC.

### What is Healthy Greens?

Healthy Greens is all-natural 100% Oat Grass (*Avena sativa*) grown using purified water in an optimal and pesticide free environment.

### Why does my pet crave grass?

Many animals like to munch on grass in the wild. If your indoor pet is munching on your houseplants, it is a good idea to purchase Healthy Greens weekly. This way your plants will be safe from your pet and your pet will be safe from any potentially toxic houseplants. Scientists are unsure why many cats, dogs, birds, reptiles and rabbits like to eat a small amount of grass per day. Some have suggested that it adds valuable roughage/fiber lacking in their diet. Some say that it is a natural aid in digestion helping with the passage of hairballs and gastric discomfort. Packed with vitamins and minerals, cereal grasses like Healthy Greens Oat Grass definitely add dietary benefits to your pet's menu. And by their reaction you'll know that they definitely consider Healthy Greens a "treat".

### When should I give Healthy Greens to my Pet?

Your pet will enjoy Healthy Greens any time you bring it home, but most pets will crave consistent grazing opportunities. One container of Healthy Greens should last your pet approximately one week. Simply place it on the floor in a spot that is convenient for you and your pet and let them graze periodically. Or, clip a small amount of oat grass and serve it mixed with your pet's regular food.

### Can I serve Healthy Greens to my pet bird?

Absolutely. Healthy Greens are an excellent source of vitamins for birds. We recommend introducing Healthy Greens into your bird's diet gradually. Clip a small amount and mix with bird food. Don't let your bird eat from the container unattended. Some birds may try to chew on the plastic container. Those rascals!

### Can I serve Healthy Greens to my pet rabbit?

Yes. It is a great treat for rabbits. We recommend introducing Healthy Greens into your rabbit's diet gradually. Clip a small amount (6-7 blades) and offer it to your rabbit. Don't allow your pet rabbit to consume the entire container of Healthy Greens in one sitting.

### Can I serve Healthy Greens to my pet reptile?

Absolutely. Iguanas, tortoises, lizards and turtles will benefit from the rich supply of vitamins and minerals in Healthy Greens. Clip some Oat Grass from the container and feed it directly to your pet, or mix it with their regular food.

### Can I serve Healthy Greens to my cat?
